Spinal Cord & Peripheral Nerve Disorders – Section Summary

NMO • GBS • Organophosphates • Myasthenia

Critical Care Board Review • Section 18 • MCQ-Oriented

1. Key Points

- Transverse myelitis + optic neuritis → **NMO**; check bladder/bowel retention
- Ascending weakness, areflexia → **AIDP (GBS)** → monitor **FVC & NIF**
- Organophosphate seizures → lorazepam, intubate, **atropine + pralidoxime**
- Myasthenia: **3-Hz RNS decrement ≥ 10%**
- Pregnancy doesn't worsen long-term MG outcome

2. High-Yield MCQ Pearls

- [x] GBS → FVC/NIF
- [x] MG: RNS decrement

1. Key Points
