AKI & Renal Replacement Therapy – Section Summary

RRT • Citrate • Contrast • AIN • Anti-GBM

Critical Care Board Review • Section 27 • MCQ-Oriented

1. Key Points

- Urgent indications → **haemodialysis**
- Massive transfusion → **citrate toxicity** (low iCa)
- CRRT filter clotting → anticoagulation (heparin/citrate)
- Gadolinium in CKD → **nephrogenic systemic fibrosis**
- Contrast AKI prevention → **IV hydration** before and after
- Drug rash + AKI (AIN) → **change antibiotic**
- Haemoptysis + AKI → **anti-GBM disease**

2. High-Yield MCQ Pearls

- [x] AIN: stop the drug
- [x] Anti-GBM: lung + kidney

1. Key Points
